PROFICIENT

Vue
AngularJS
Vuex
MySQL
Jest
Bootstrap

EXPERIENCE

Sputnik ATX • Freelance Developer
sputnikatx.com

A Texas-based accelerator to help makers and businesses lift off
* Refurbished website, making it responsive and more inline with Sputnik's brand
* Integrated Twitter and Instagram feeds
* Incorporated Ajax loading for an enhanced web experience

Amanda Pascali • Freelance Developer
amandapascali.com

A personal website for local singer-songwriter, Amanda Pascali
* Lazy loaded image gallery for optimal web performance
* Built website from scratch using React
* Hosted website with Amazon S3

APPLICATIONS

Urban Trails • Software Engineer
urbantrails.io

A mobile app for Austin cyclists to navigate and explore the city's amenities
* Created Secure Sockets Layer using Self-Signed Certificate for safely tracking user location
* Constructed RESTful API and Vuex store to centralize flow of public-transport data
* Set up notifications for navigation and displaying nearby points of interest
* Tracked and updated user's current location within a 40m radius using native Geolocation API

Concreet Calendar • Software Engineer
concreet-legacy

An application that schedules events based on time schedules of everyone invited
* Enabled Webpack for a faster load time and development experience
* Added drag and select functionality to calendar for easy re-scheduling of selected events
* Replaced old forms and inputs with React Modals, integrating them with Google Calendar API

LifeTime Capsule • Software Engineer
lifetime-capsule

An app that sends 'capsules' of letters to intended recipients upon certain dates in the future
* Architected back-end routing and implemented RESTful API using Node and Express
* Designed and constructed Mongo DB to handle storage and simple authentication
* Improved UX by implementing authentication-feedback features for the login and signup process
